On 23rd October, 2024, the staff and scholars participated in pruning activities of the over-grown tree branches of the avenue plantation along the main approach road of the residential colonies of the Institute, particularly in view of the upcoming cyclonic storm in the east-coast as well as for aesthetic purpose. Later, they collected the pruned branches and disposed of into the compost pit. The 'Before and After' photographs of the site and some of the activity photographs of 23.10.2024 are presented below.
